NOTE:

National Leased Lines

All point to point dedicated circuits operating within the Kingdom of Eswatini. These include what used to be called:

- Leased lines
- Mini links, interconnect leased lines etc.
- Cross-border leased lines (Dedicated circuits that run to the border)
- Point-to-Point circuits that were dedicated to the delivery of internet to ISPs and Operators

From now on, all of these lines will be charged the same amount for the same speed (previously these lines were charged differently).
